Several errors occurred during simulation

Wu Yankang

2022.10.18

Component parameters and layout

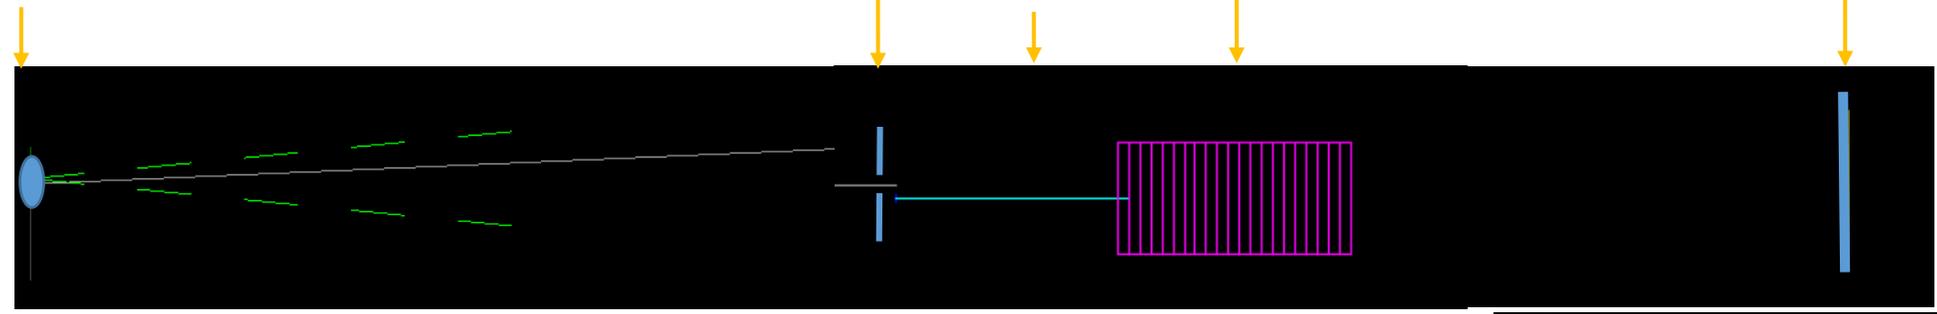

Point source

Slit

M1

M2

CCD

Y-Z plane

length of mirror	12mm
Width of mirror	12mm

Component coordinates:

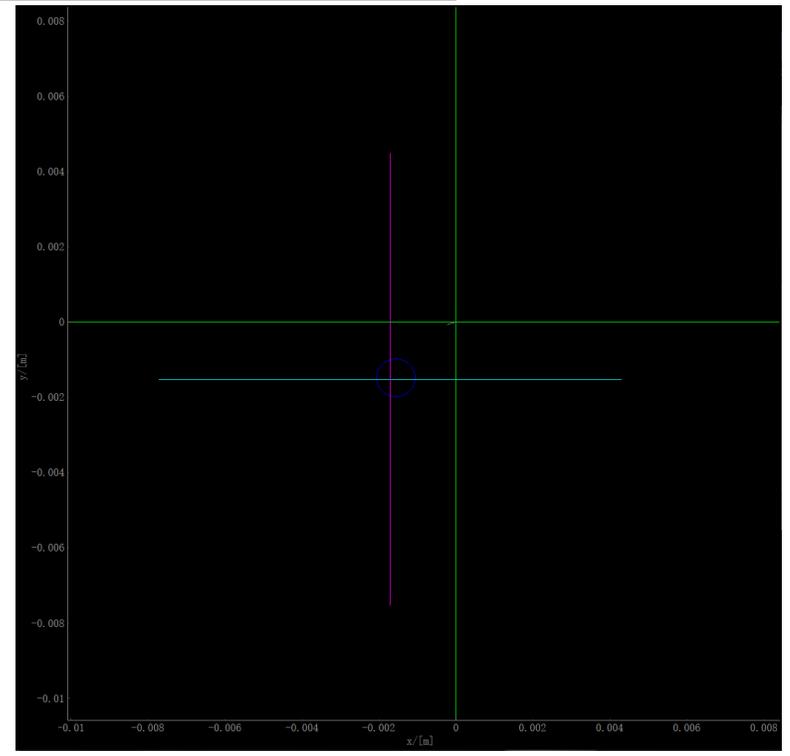

Source_pt(0 ,0 ,0)

Slit(-0.001566, -0.0014814, 0.194)

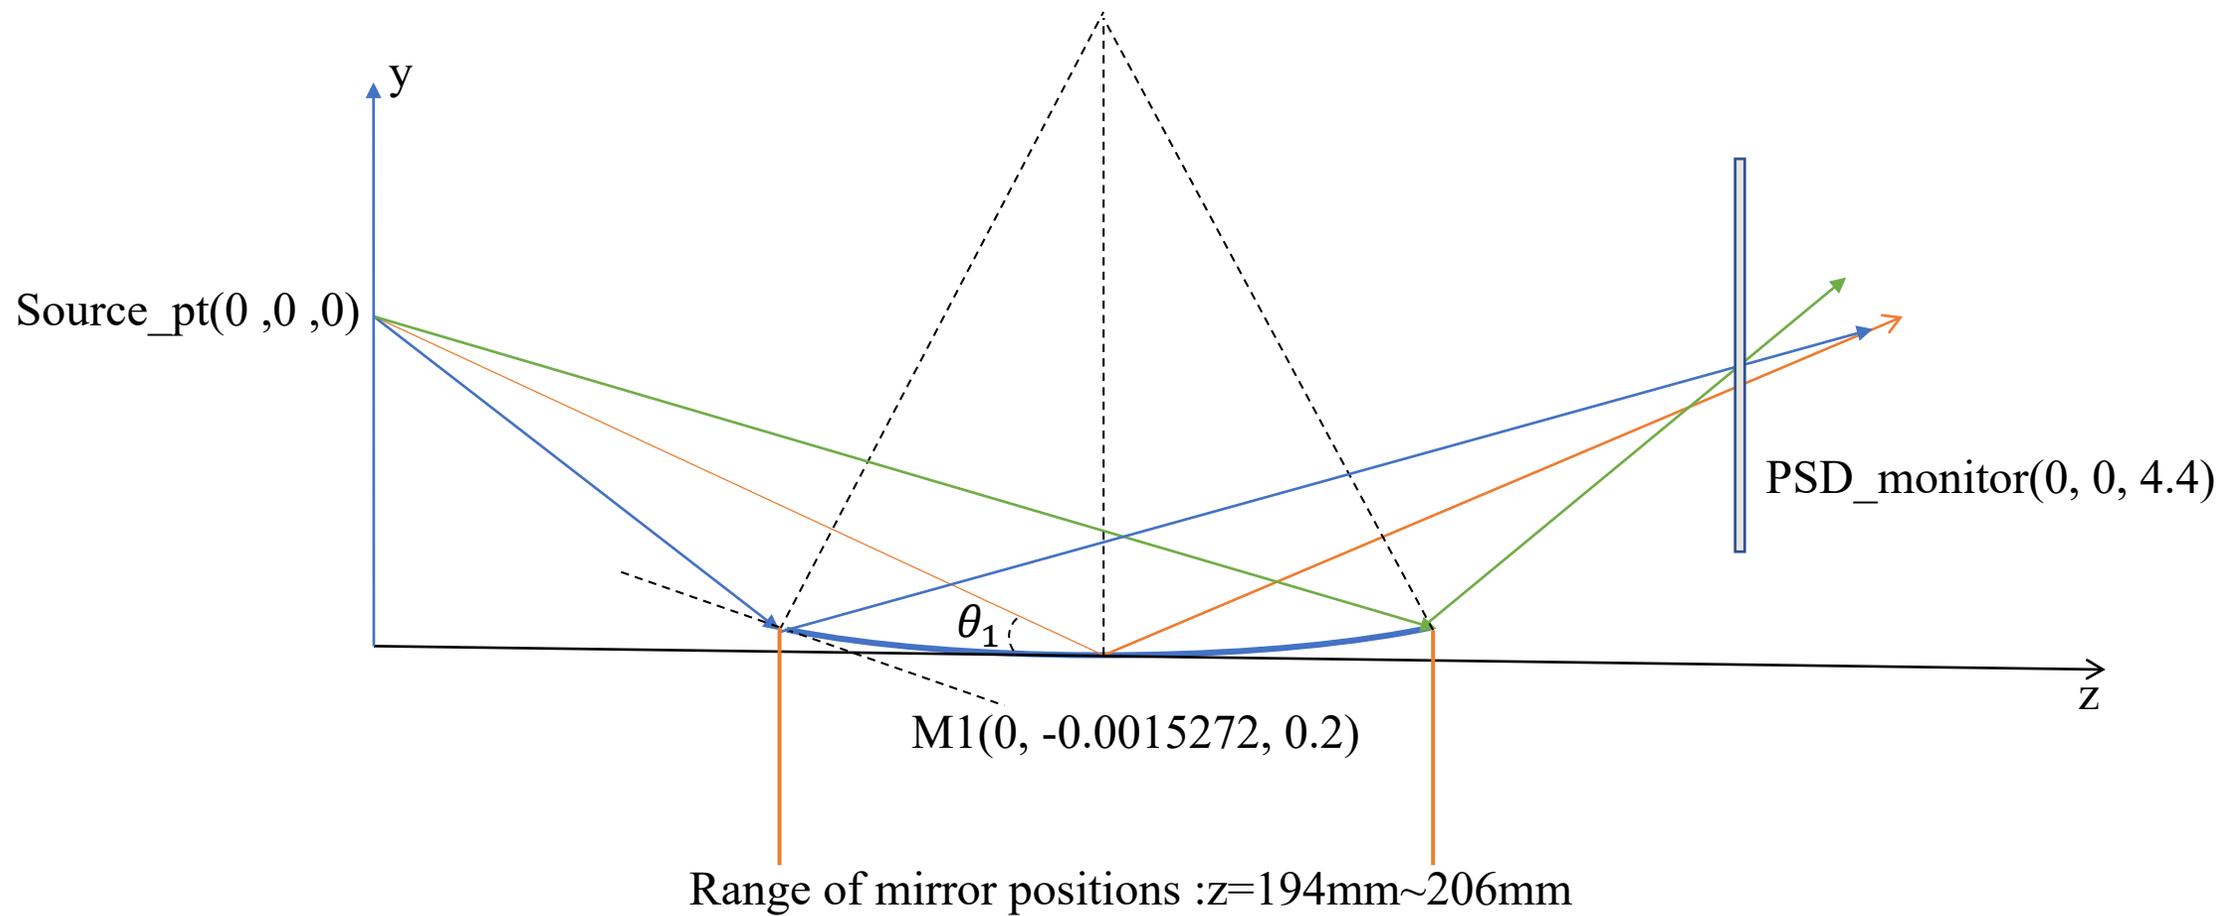

M1(0, -0.0015272, 0.2)

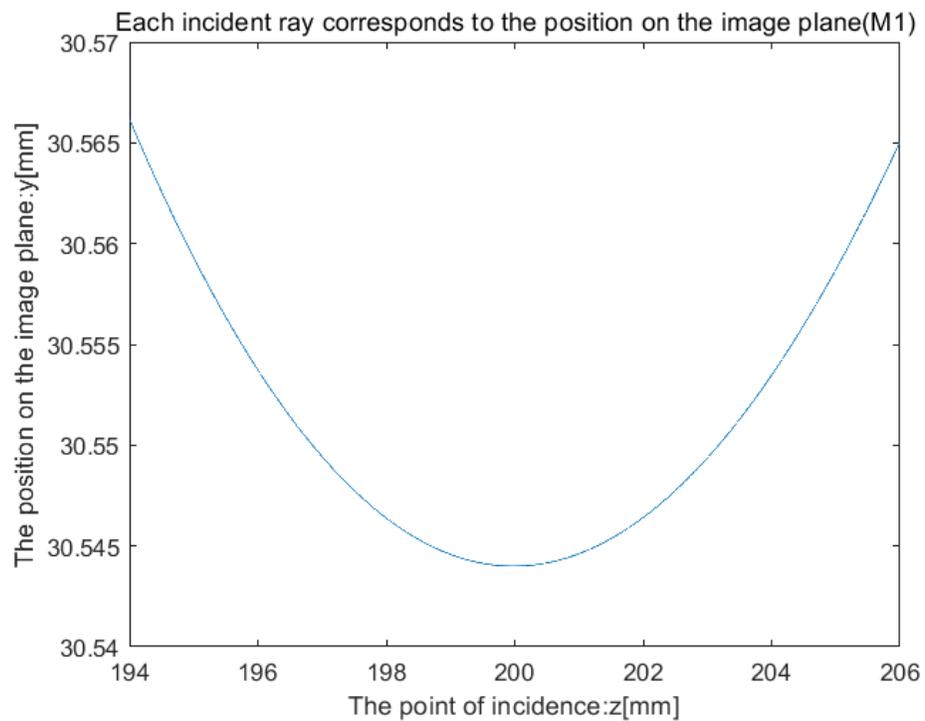

M2(-0.0017113, 0, 0.212)

PSD_monitor(0, 0, 4.4)

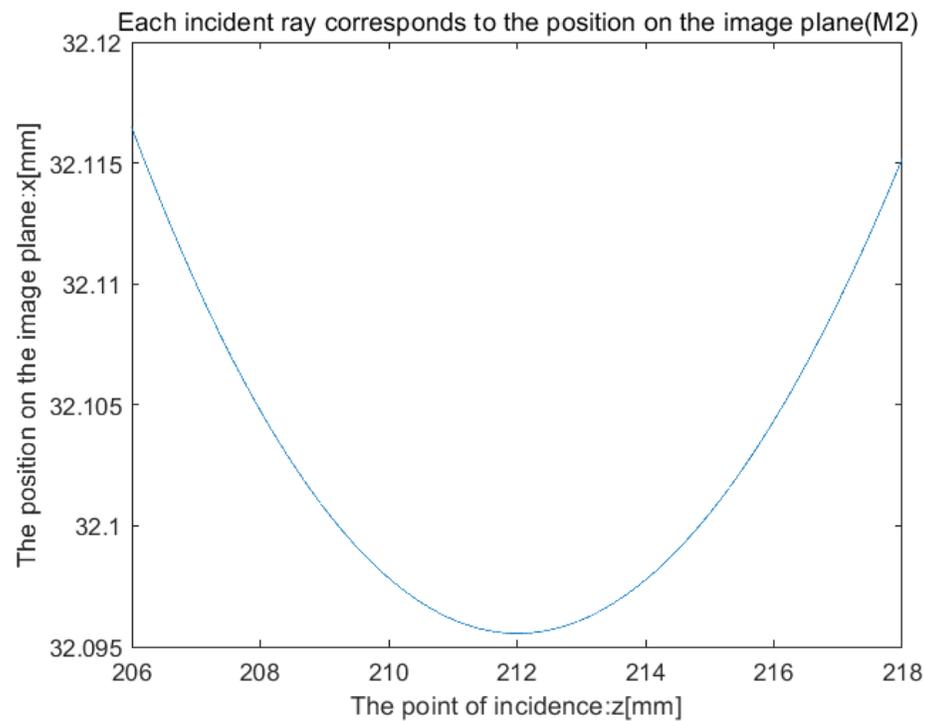

X-Y plane

$$y \in [30.5440 \sim 30.5662]$$

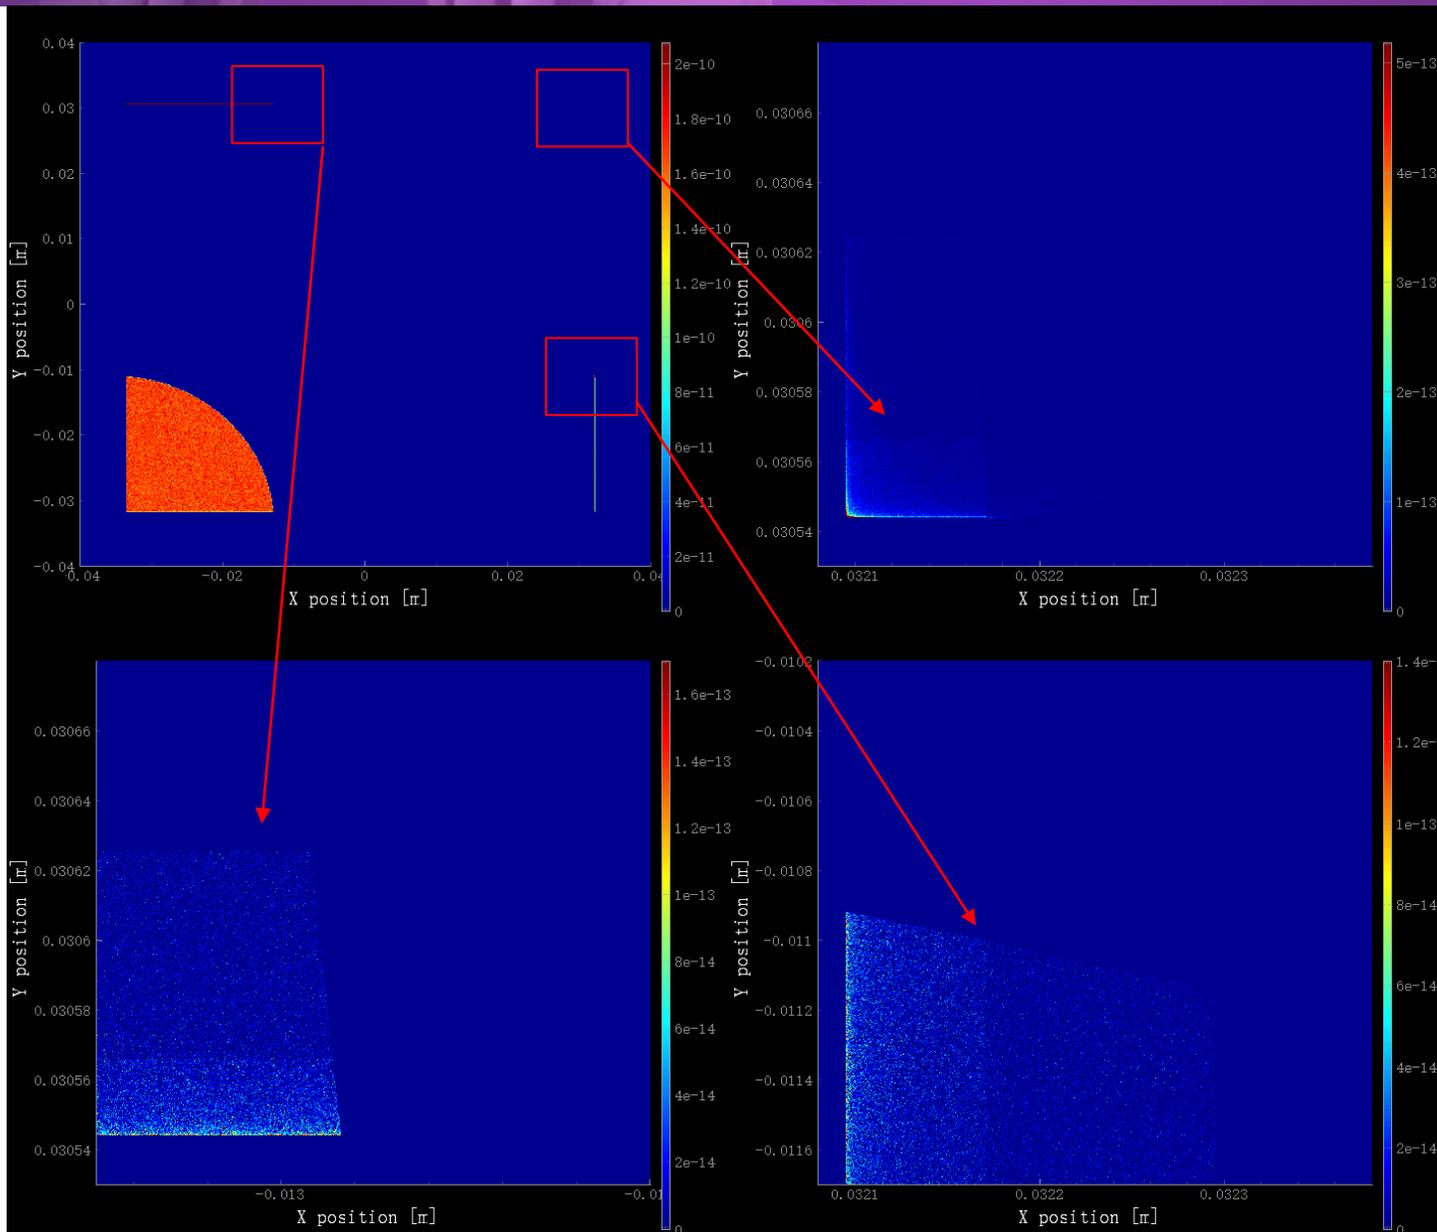

$$x \in [32.0956 \sim 32.1165]$$

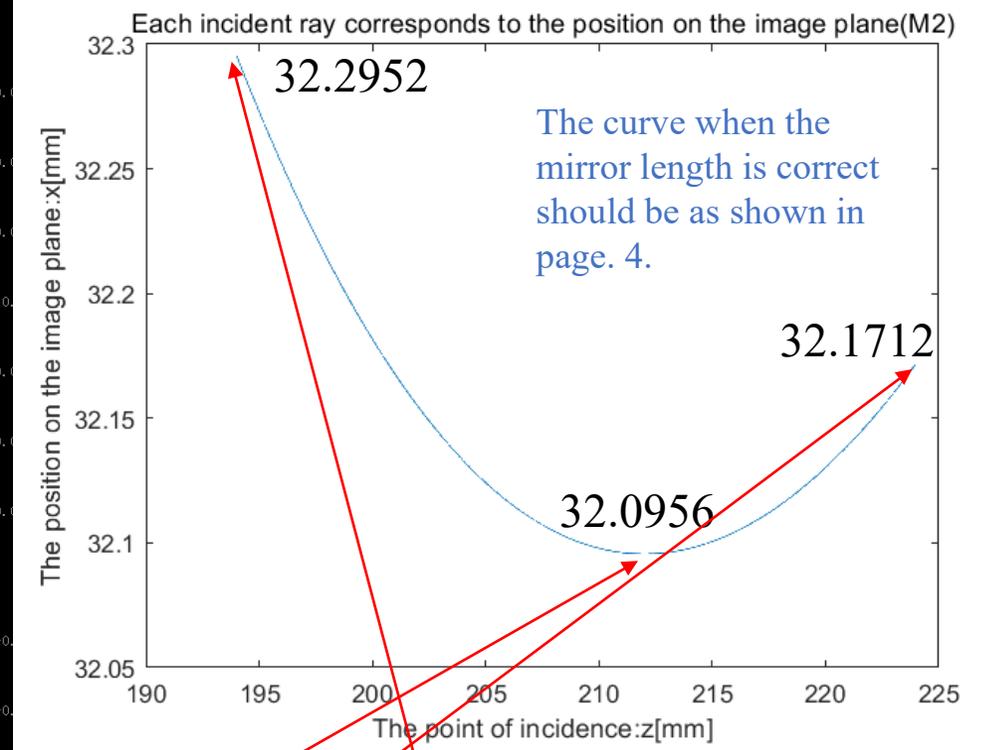

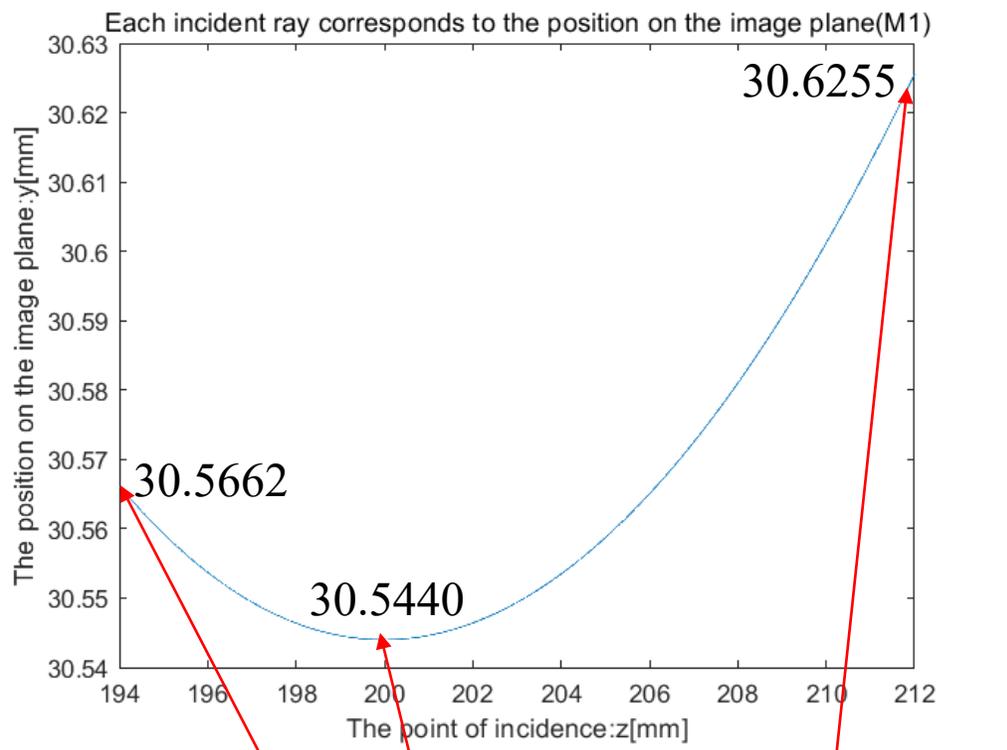

The position of the image plane corresponding to the rays incident on different positions of the mirror. Based on geometric optics calculations.

The program parses the wrong mirror length

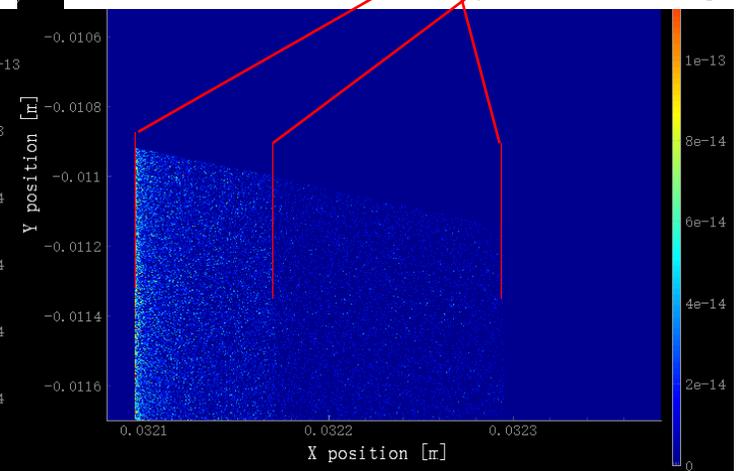

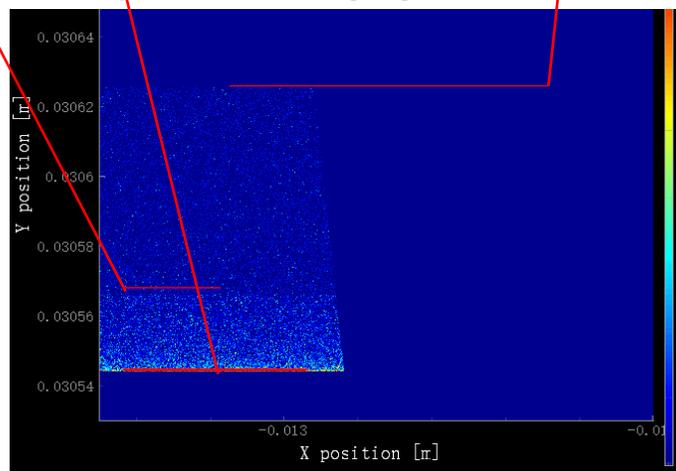

The program parses the wrong mirror length

(M1) Range of mirror positions considered by the program: [194,212] ✗

We need : [194,206] ✓

(M2) Range of mirror positions considered by the program: [194,224] ✗

We need : [194,218] ✓
